

## ENERGY Coverseal™ - Flexible insulation end cap

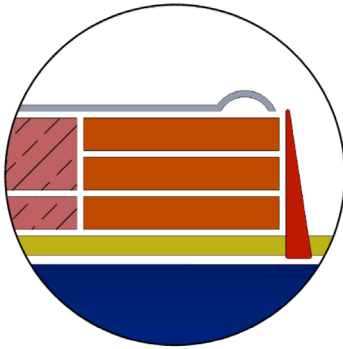

ENERGY Coverseal™ is the most flexible end cap solution, it will negate any obstruction and does function with all heat tracing.

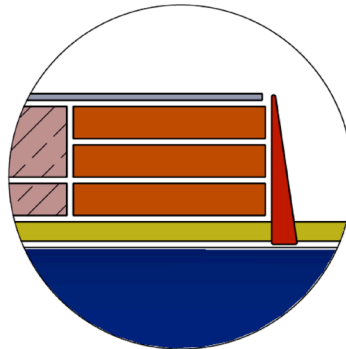

Traditional end caps of SS316 has over time proven not to be completely water proven. ENERGY Coverseal™ avoids water ingress and do not damage the surface on pipes or coatings. Not necessary with a large stock of different end cap dimensions and eliminates all need of measurements.

## Advantages with ENERGY Coverseal™

- Flexible – no special items on stock
- Fits any pipe dimension
- Can be used for class 5 end caps
- Water proof
- Easy to use with heat tracing
- Avoid damage on pipe surface
- Temperature from -50 °C up to 180°C
- Easy to install
